

## Unique Features

Advanced Gear Pump System 

Counter 

Smart Pre-cooling 

Overnight 

Low Mix Alarm 

6-level Hardness Adjustable 

Error Code Indication 

The latest designed pump feeding commercial huge output ice cream machine for soft-serve ice cream. No need to worry about the ice cream mixture spurting problem from the gear pump when preparing ice cream or frozen yogurt. Simple and modern style of stainless steel shell adds aesthetic value to your bar.

## General Parameters

Model	TC582A	Installation	Standing
Capacity	600cones/H(80g/cone)	Flavor	2+Twist
Hopper/Quantity	14L/2	Cylinder/Quantity	2L/2
Net Weight	235KG	Gross Weight	285KG
Product Dimension	540x832x1458 mm	Packing Dimension	650x940x1680 mm

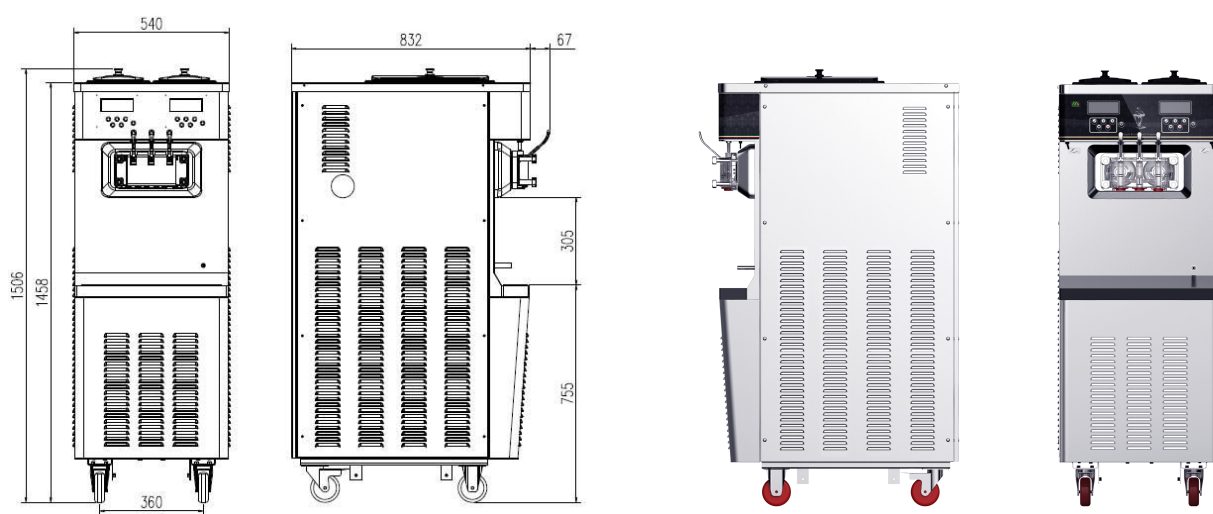

Note: The capacity depends on the operating environment and mixture.

## Electrical Specification

Rated Power	4300W	Voltage/Frequency	220V/50Hz/60Hz
Motor/Quantity	750W/2	Suggested Power Supply	25A

## Refrigeration System

Compressor/Quantity	Tecumseh 1.5HP/2	Refrigerating Capacity	5473x2 BTU/H
Refrigerant	R404a	Cooling System	Air Cooling

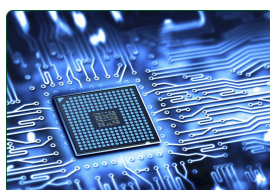

Taycool is never satisfied with a good machine, but the state of perfection.

- Advanced pump system prepare lighter weight, higher overrun, better texture ice cream. Every piece of tiny pump parts are so precisely and accurately to ensure every detail fits perfectly.

- Perfect continuity of dispensing technology, creates a smooth, creamy ice cream that replicates the consistency of soft serve.

- Integrated frequency converter reduce energy consumption and noise.

- Polished nuts and transparent discharge door highlight the style of your stores.

- Tecumseh compressor and other components from named producers ensure high performance and long durability.
